PROFESSIONAL EXPERIENCE

DEVOXYS   **Ben Arous, Tunisia**
Software Engineer   **Sep 2024 - Present**
- Created **SheapIt**, an advanced logistics platform at **Devoxys**, leveraging React, Next.js.
- **Operated and implemented core features** including team management, shipment tracking, and automated logistics document generation, reducing manual workload by **30%** and accelerating document processing time by **40%**.
- **Engineered a scalable and high-performance architecture**, achieving a **25% improvement** in platform speed and ensuring seamless functionality during rigorous testing across multiple devices and environments.
- **Conducted rigorous performance assessments** that uncovered critical bottlenecks, resolved more than 95% of reported issues to drastically improve system stability.
- **Oversaw the deployment process**, ensuring that the build pipelines were optimised and that there was no disruption during the launch. Achieved a **30% reduction** in deployment times to facilitate future growth and scalability.

NEOPOLIS DEVELOPMENT   **Nabeul, Tunisia**
Web Development Intern   **Feb 2021 - Mar 2021**
- **Planned and implemented** a professional art gallery management application utilizing Vue.js and Laravel, achieving a **20% improvement** in overall performance and responsiveness.
- **Worked collaboratively** with the design team to produce **15** sets of wireframes, prototypes, and high-fidelity mock-ups, ensuring a user-friendly and visually appealing interface for the application.
- **Orchestrated a detailed review process** for app capabilities, pinpointing key areas for improvement that resolved significant usability challenges; findings directly addressed 3 major causes.

PROJECTS

Residia | Typescript, React, Next.js, Tailwind CSS, MongoDB, Prisma ORM   **Dec 2023**
- **Residia** is an innovative, user-centric real estate platform designed to simplify the home discovery process. Developed with a focus on providing an intuitive and seamless user experience.

Oladoc | Typescript, React, Next.js, Tailwind CSS, PostgreSQL, Prisma ORM   **Jun 2024**
- **Oladoc** is a comprehensive healthcare platform that bridges the gap between patients and healthcare professionals, enabling users to easily book appointments online and access a range of medical services.

Shadcn-Vue | Typescript, Vue.js, Tailwind CSS, Vite, Vitepress   **Sep 2023**
- **Shadcn-Vue** is an unofficial, community-led port of shadcn/ui for the Vue.js. The project was refined to provide Vue developers with a similar, customizable UI component library that was originally built for React.

EDUCATION

NABEUL HIGHER INSTITUTE OF TECHNOLOGICAL STUDIES   **Nabeul, Tunisia**
Bachelor's Degree in Computer Technology   **Sep 2021 - Jun 2024**

DAR CHAABANE EL FEHRI HIGH SCHOOL   **Dar Chaabane El Fehri, Nabeul, Tunisia**
High School Diploma in Computer Science   **Jun 2021**
